North-Holland

Subject Index Volume 8 (1986/87)

Accessibility 445, 459
Adaptive control 23, 87, 93, 97, 321, 333, 389, 397
Affine systems 359
Annealing 297
Average cost 173
Averaging 23

Balanced realization 303
Bifurcation 467
Bilinear optimization 1
Bilinear stability criteria 85
Boundary layer 129
Boundary value problems 153

Canonical decomposition 425
Canonical form 241, 359
Cartan equivalence 463
Cascade 63
Certainty equivalence 93, 97
Cheap control 181
Closed-loop identification 87
Compensators 63, 205, 417
Complexity 1
Conditional invariance 69
Controllability 5, 75, 205, 211, 445, 459

DARMA systems 417
Deadbeat control 417
Decentralized control 441
Decoupling 347, 367, 453
Delay systems 23, 307, 313
Descriptor systems 29
Detectability 425
Differential algebra 147
Differential games 181
Differential inclusions 445
Diffusion 429
Digital control 417
Diophantine equation 121
Dirichlet problem 173
Discrete-time systems 75, 85, 249
Distributions 69, 375
Dynamic programming 435

Eigenstructrure assignement 221
Equivalence, feedback- 241, 463
Euler–Poincaré characteristic 367
Experiment design 197

Feedback equivalence 241, 463
Filtering 51, 93, 153, 381, 441

Generalized systems 29, 205
Graded parametrization 231

Graph topology 231

H^∞-infinity optimization 13, 307, 313
Hamilton–Jacobi equation 435
Hamiltonian systems 289
Hankel matrix 39
Hankel operator 13, 303
High-gain feedback 181, 397
Horocycle 247
Hydroelectric plant 281

Identification 97, 161, 197, 327, 333
Immersion 367
Incentives 475,
Infinite-dimensional systems 225, 303
Infinity, structure at 137
Information 93
Interpolation 313
Invariant distributions 69, 137
Inverse system 453
Invertibility 147, 345

Kalman filtering 441
Kronecker invariants 417

Lagrangian submanifolds 289
Large-scale system 441
Least-squares problems 161, 327
Lie groups 359, 375
Linear quadratic control 87
Linear systems 1, 29, 39, 63, 75, 115, 121, 161, 231, 241, 351, 405
Linearization 249, 367, 453
Lyapunov function 445

Markov chain 297
Maximum principle 261, 273, 281
Measure-preserving vector field 459
Minimality 289
Model reduction 405

Nehari problem 307
Nonlinear systems 55, 69, 129, 137, 147, 153, 249, 289, 345, 359, 367, 375, 445, 453, 459, 463, 467
Non-subsidiary control 475
Normal form 359

Observability 1, 205, 247
Observers 29, 115
Optimal control 23, 55, 129, 173, 261, 273, 281, 417
Optimal stopping 173
Optimization 1, 297, 475
Orbit closure 241

Parabolic systems 55
Peller–Khrushchev conjecture 303
Periodic systems 75
Persistency of excitation 197, 333
Perturbations 105, 397
Pole placement 79, 115, 205, 333
Polynomial solution 411
Programming 1
Projection algorithm 161

Reachability 75, 79
Reachable pairs 241
Realization 39, 289, 303
Regulator problem 411
Relaxed control 55
Resource allocation 475
Riccati equation 103, 181, 351, 411
Robustness 121, 321, 327, 367, 397
Routh–Hurwitz criteria 85

Saddle points 445
Sampled systems 389
Self-accessible states 225
Sensitivity 115, 121, 307, 313
Separation 429
Simulated annealing 297
Singular perturbation 129
Singular values 303
Smoothing 51
Stability criteria 85, 97, 105, 321, 445
Stabilization 121, 211, 389, 425, 467
Stochastic control 47, 429, 435
Stochastic optimization 297
Stochastic systems 51, 381, 441
Structural invariants 5
Structural stability 359
Structure algorithm 137
Subsidizing 475
Symplectic manifolds 289
Systems over rings 79

Time-varying systems 97, 211, 425
Toeplitz operator 13
Transfer function synthesis 221
Transcendence degree 147
Two-point boundary-value problems 129

Uncertain systems 351

Volterra equations 153

Weighted sensitivity 307
